

## ADVANCE TRUCK SIMULATOR FOR INDIAN ARMY

ADH Labs is proud to partner with

**INDIAN ARMY**

in developing an

**Advance Truck Simulator**

for training and testing drivers.

Advanced Truck Simulator is projection based simulator system with actual truck parts (steering wheel, gear shifter, clutch, accelerator and brake pedals, handbrake, seatbelt, horn etc).

The simulator provides a fully immersive environment, comprising of a actual truck cabin with large visual screens covering 180° field of view.

High level of realism helps in train and test the drivers in high-risk scenarios.

### i-Tech Truck Driving Simulator

i-Tech Drive Truck Simulator is a fully functional, pre-configured simulator that contains all necessary HW and SW modules, Visual System, Visual Database, with an optional a three-axis motion system and a fully functional Truck cab with instrumentation to provide a 'real-life' Truck driving environment.
